# RESISTANCE PACK DAO

# WHO WE ARE

We are the [Resistance Pack NFT collection & DAO](#), one of the earliest collections and the first NFT DAO on TON. Our collection of 10 000 Resistance Pack Dogs was inspired by Telegram founder Pavel Durov's idea of using a Dog as a symbol of Resistance — and the NFTs were drawn by the same artist who was behind the Resistance Dogs on Telegram!

• PAVEL DUROV • TON • DAO • PAVEL DUROV • TON • DAO • PAVEL DUROV • TON • DAO • PAVEL DUROV • TON • DAO

**30%** of all minting profits  
will fund the DAO

**2%** of re-sale profits will continue  
to fill the DAO treasury

As man's best friend, we believe in the power of the people, that's why after minting is over, the project will be governed by a DAO fund formed by Resistance Pack NFT holders. 30% of all minting profits will fund the DAO, and 2% of re-sale profits will continue to fill the DAO treasury. You will decide how to spend those money and which TON projects and Resistance causes to support!

# WHY WE'RE HERE

We aim to unite people for solving real -life modern Human Rights issues through the power of crypto and NFTs. To build a real Resistance unit from our community, to act, and not just talk. To give more people a chance to live where they choose, safe and financially independent.

A DeFi DAO doesn't answer to local authorities and can't be stopped using traditional pressure tactics, it can be as unstoppable as its members want it to be — let's use that force to make the world a more free, safe place!

How many people have already had to leave their homes because of political, economical, and humanitarian disasters?

How many people had to sacrifice good jobs and savings to get to safety?

The Resistance Pack is here to start slowly but steadily help people by creating and supporting a better infrastructure and environment for change. We believe that Resistance and fighting for Human Rights should be rewarded, not punished, and that having to leave your home doesn't have to devastate your livelihood.

# WHAT WE BRING TO THE TABLE

People who care enough to act deserve to be rewarded and to stand out from the crowd. That's why our mission is to ensure that our Resistance Pack members benefit from their fight instead of suffering from it. We're building a place in the world where supporting the basic Human Right to a good, safe life isn't just right, it's profitable:

**Resistance Pack members  
will get benefits**

**Investor and partner  
program privileges**

The Resistance Pack is focused on integrating into the TON infrastructure and collaborating with partner projects on TON, turning the Resistance Pack NFT into an access key to partner services, programs, and benefits. We want to help build a TON family that supports each other, strengthening the entire ecosystem. We'll work towards generating unique partner offers specifically towards our Pack members — you deserve to get noticed everywhere you go!

# Why Now

## TON is hot

The Resistance Pack is on the front line of TON NFTs — this is one of the first projects on the blockchain, conceived in early January 2022. TON is just launching its NFT contract this year, and is expected to experience yet another surge.

## \$2-3 million

TONCOIN daily trading volume is already worth north of \$2-3 million on a slow day, and this is still just the beginning — the next 10 years are predicted to bring more steady growth to investors.

## Q1 2022

This means that Q1 of 2022 is the time to hop onto the TON NFT train early to make the most of your investment

# RELOCATION JUST BECAME A NEW KIND OF GLOBAL ISSUE

In February 2022, the world changed forever. Regardless of what news you read and what views you hold, a humanitarian disaster that won't go away soon is raging in Eastern Europe today, and it's driving people out of their homes and countries.

## It's a **new** world

But today, many of these people have opportunities no European migrant crisis has seen before — these 'refugees' can keep or get well-paid jobs in IT, marketing and other remote-work friendly fields, and it's important to make sure they don't lose this opportunity. Financially independent migrants keep businesses running, support global economies by spending their earned money anywhere they live, don't drain welfare resources, and don't pull out their crypto investments out of the market.

# THE COLLECTION

## Full pack

The big Resistance Pack family consists of 10 000 unique TON NFTs with 5 Dog breeds, a Cat, and several special collections. The Husky is the top Dog in the Pack, but the Rare collections all have 1 of each breed + cat, so you can have a high-ranking valuable NFT with any one of our pack members. Each pack member represents a Resistance Pack principle and has its own character and voice.

Breed/collection	Nº of NFTs	Principle
Labrador	3650	Anonymity
Bull Terrier	1450	Privacy
Pug	1450	Justice
Shiba	1450	Rationality
Cat	1150	Solidarity
Husky	750	Freedom
Rares	100	Luck

Even though Breed or Collection are the key determining Rarity factors, each NFT's Rank depends on other features, too:

Clothes **3%-15% rarity**

Mouth **5% - 25% rarity**

Eyes **2%-25% rarity**

Ears **5% - 50% rarity**

Backgrounds don't have a Rarity Score and are evenly spread through the collection, excluding the exclusive Rare Packs.

## Rare pack

Unlike the remaining generated collection, these Rare Packs are fully hand-drawn by our artist. Each collection includes all 5 breeds + cat and is dedicated to a theme, including characters and styles you'll recognize well.

### Base pack

The OG Pack you can recognize from our site, socials and more — the Base Pack, the anonymous Resistance fighters behind this whole ordeal.

### Abstract pack

Who said Resistance can't be artsy? Some of the last century's biggest revolutionary visionaries were artists who shaped the visual world we live in today, and this Pack is an avant-garde homage to them.

### Movie pack

Do you recognize this legendary pack? They're all from the biggest iconic Resistance films you know and love, from freedom-loving Braveheart Husky to the Chosen Cat — we believe in the Resistance as much as these guys!

### Cartoon pack

More familiar faces — we bet you can name all of these cartoons, and a lot of them probably inspired you to grow up to be the Resistance fighter you are today. Or at least to be a Monday Resistance fighter.

## Monster pack

Boo! It's the Monster Pack, for all your terrifying, scary, slimy, ghoulish Resistance needs — we're a diverse and inclusive family, Monsters are Pack members too.

## Hunter pack

This tough and battle-ready Pack is prepared to fight for Resistance, and fight in style — from Long Bangs Pug to Katana Cat.

## Steamboat pack

If you liked the Cartoon Pack from your childhood, how about an Old Toon Pack from your grandparents' childhood? These black & white oldies were Resisting before you were born.

## Galaxy pack

Resistance in Space! This Rare Pack is literally out of this world, with gorgeous nebulas and star clusters shining across our entire Pack while we spread Resistance ideals around the universe.

## Angel & Demon pack

The rarest of the rare, the Angel and the Demon — who will you choose, non-violent Resistance or hardcore Revolution?

## Partner pack

We're in negotiations with other TON projects to launch partner collections of 1-3 NFTs. Currently, there's almost 50 spare slots in the collection to fill with these special microcollections with the highest Rarity Ranks. These partner collections will be a key part of raising DAO funds and creating new benefits and special offers for Resistance Pack members — you can read more about them in the DAO section.

PARTNER  
PACK

## Telegram pack

Our first collection dedicated to another project is the Telegram pack. An homage to the Resistance Pack origins on Telegram — the iconic OG Resistance Dog in the Pack style, ready to send messages of Resistance worldwide with its paper plane.

# ABOUT THE PACK

Project timeline and Roadmap, how the Resistance Pack DAO works, and who's behind the project.

Landing  
Done

Whitelisting  
March 1 - April 1

Closed pre-sale  
April 1 | 3000 NFTs

Public Sale  
April 7

Marketplace  
TBA

DAO voting system  
TBA

## You + DAO

decide how the project will develop after the voting system is launched!

# RESISTANCE PACK DAO

The initial DAO fund will consist of 30% of initial minting profits. With the average NFT price of approximately 100 TON, that's north of 300 000 TON! And the fund will continue to get a percent of the Resistance Pack sales profits, as well as additional revenue sources.

## Where the DAO Fund Gets Money?

### 30% of the minting profits

We will automatically allocate 30% of all minting profits — pre-sale and public sale — to the future DAO fund treasury for our stakeholders to have their initial capital to work with as soon as the DAO voting mechanics are launched.

### 2% of the marketplace commission

We will share re-sale profits with the DAO to keep a passive income flowing to the fund regardless of how its other investments are doing, allocating 2% of marketplace commissions to the DAO fund.

### 80% of partner collection sales

One of the Resistance Pack's revenue sources aimed directly to raise funds for the DAO will be our partner collections. We will dedicate microcollections of 1-3 NFTs to a partner project, with art incorporating the partner's branding and style, and 80% from their sales profits will be allocated to the DAO fund. Partner collections will also be created for projects the DAO supports with grants from the Resistance fund. Moreover, each partner microcollection NFT will also give its owner a voice and a vote in the DAO. We're already negotiating with several companies, and the first additional collection for the BasicChain project will be created after the DAO governance tools are launched. This approach will allow us a bigger marketing reach across partner communities,

and considering how many new TON services are entering the market, we want to make sure these projects' communities get the opportunity to join the Resistance DAO fund as NFT holders.

## DAO investments

DAO members will vote on using the Resistance fund to invest in the TON infrastructure to ensure the fund's financial wellbeing —the more financially viable the fund is, the more power it has to forward Resistance causes.

## Donations

The DAO fund will welcome voluntary donations, with rewards and special NFT options for donors, as well as automatic eligibility of donors to get rewards from the DAO member prize fund.

## Where the DAO Fund Gets Money?

Each Resistance Pack NFT holder has a vote and the opportunity to forward a petition to allocate investments or support a cause. Here's how it works:

- Petitions are signed by stakeholders via DAO voting mechanics
- Each petition has 30 days to collect signatures
- Petitions with the most pro votes are reviewed and the final investment conditions are set by the DAO stakeholders who voted for this petition

## Where the DAO Fund Spends and Re-Allocates Money?

After all involved stakeholders finalize the details and terms of each investment or donation, a transaction request will be launched for all DAO members to review and vote on. The Resistance Pack project team is responsible for guaranteeing the transparency of the process — that's why we're not operating anonymously and the team's names are fully disclosed.

# TEAM

The Resistance Pack was launched by an experienced team of crypto experts. Some of our team members have had personal experience with Resistance and its consequences, including economically or politically motivated relocation. That's why we chose our social mission — the Resistance cause matters to each of us personally in its own way, and we believe that everyone has a right to pursue a happy, safe and successful life.

But we're more than just strong Resistance believers, we're crypto and NFT pros with scores of projects and years of experience. And, of course, one of the stars of the team is the artist behind the first Telegram Resistance Dogs

## Dmitry Parker

6 years in crypto, 6 successful projects. COO Squad.app, ex-CMO Midas.Investments

## Vina Lapkes

15 years in content, in crypto since 2017, specialized in NFT projects

## Oleh Pivovarenko

Data-driven product marketing manager. 12+ years worth of experience in global projects.

## Ruff Rubaker

15 years in design, 3 successful crypto projects. Head of design at Crypterium

## Alexander Ivanov

18 years IT, 7 years crypto, 12 successful projects, CEO X-Technology

## Theodor Chernyshev

Digital resistance political scientist

## Anton Andreev

If you know VK/Telegram, you saw my art. Doing awesome graphics for social media for 15 years.
